- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1 and 2, drawn to a method for reducing noise in a washing machine 29, classified in class 29, subclass 428.
 - II. Claims 3-20, drawn to a brake for a washing machine, classified in class68, subclass 23.3.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions of GROUP I and of GROUP II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make another and different product such as one not requiring a segmented ring with increasing tolerances of imperfections; and formed controlled leak paths.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
